

THE SYSTEM THAT WILL NOT LET YOU DOWN!

100% AUTONOMOUS SYSTEM for feeding and managing lactating sows.

Improved sow performance

- Shorter wean-to-estrus interval.
- Higher farrowing rate.
- Better body condition at weaning.
- Increased sow longevity.
- Heavier litter weight.

Easy to use and simplifies sow management

- Faster detection of problem sows by farm employees.
- Standalone system that works even if the computer doesn't.
- Easy to install.
- Easily adjustable feeding schedules and curves.
- User-friendly software and mobile app.
- Optional water management.
- Wireless communication.

Precision feeding for the lactating sow

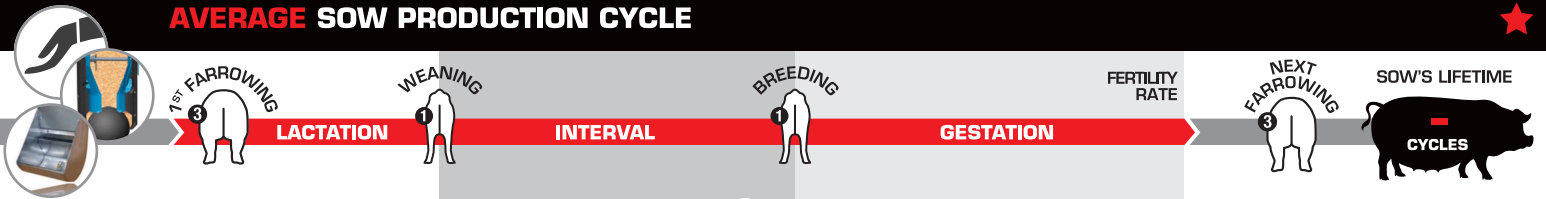

- Feed management 24/7/365.
- Highly accurate feed deliveries that can be used for research purposes.
- Reduction of feed wastage.
- Generated reports to locate low-consumption, limited, and wasteful sows.
