

PRECISION FEEDING SYSTEM FOR GESTATING SOWS IN GROUPS

INNOVATIVE FEED SYSTEM for Group Housing

- Feed Management for Group Housing
- Optional Heat Detection

SIMPLE MANAGEMENT OF GROUP-HOUSED SOWS

- Easy to install and adapt to any building type or size (new or retrofit).
- Reliable wireless system that can function autonomously short-term in the event of a computer crash.
- Simpler for sows to adapt to than traditional ESF systems.

THE PERFECT FIT TO MEET ANIMAL WELFARE REQUIREMENTS

- Decrease competition and aggression over feed access.
- Improve individual sow body condition management.
- Offers pen design flexibility to optimize sow welfare for your specific project.

OPTIMIZE YOUR SOW DATA MANAGEMENT

- Easy use of hand held tablets and automated reports to improve in-barn sow monitoring.

INDIVIDUALIZE EACH SOW'S DIET

- Best price/quality ratio in the industry.
- Using two feed lines, able to blend multiple diets according to each sow's prescribed needs.

OPTIMIZE YOUR 3G

Works in Tandem
with the 3G Stations

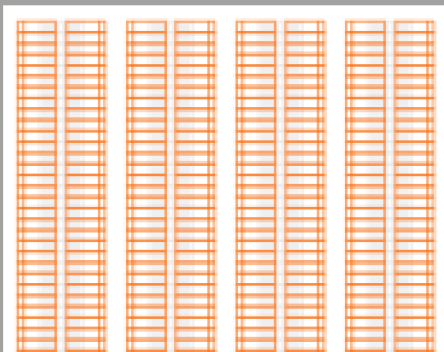

Each standalone unit enables precision feed delivery/blending and prevents residual diet contamination while allowing diet changes from remote access location.

- Record and manage complex diet changes.
- Blending combinations of distinct individual diets.
- Capable of continuing to feed animals while replacing computer, or communication equipment in the event of a breakdown.
- Notification system to alert customer to out of feed events or problems in the barn.
- Customized diets avoid over-formulation and reduction of excess nutrient excretion.
- Ability to adjust blends/mixtures as often as daily.
- Designed for use in commercial and research applications.

CONVENTIONAL GESTATION

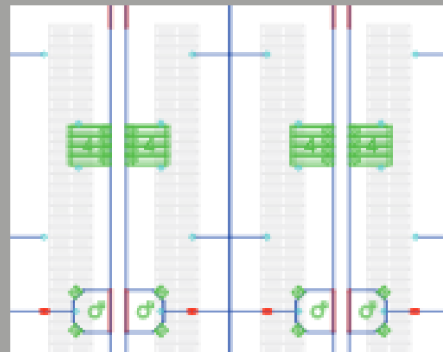

8 rows of 54 stalls = 432 stalls

Total: 432 sows

GESTATION WITH Gestal

8 gestation pens
60 sows - 15 sows / 3G station

Total: 480 sows

Layouts applicable according to the standards and regulations of your country/province/state.
