

PRECISION FEEDING SYSTEM

OPTIMIZE FEED INTAKE IN FARROWING

PREMIUM PRODUCT. BUDGET PRICE.
100 % STANDALONE

ENHANCED STABILITY

- No major electric installation needed.
- 24 V DC motor.
- Unrivalled electrical stability.

SIMPLIFIES MANAGEMENT

- Faster detection of problem sows by farm employees.
- On-demand sow feeding using a trigger.

SAVINGS

- Working hours better invested: Workers can focus on raising pigs, not on managing feed.
- Automatically generate reports to locate off-feed and wasteful sows.
- Increase feed intake and reduce wastage in your sows.

PRECISION AND VERSATILITY

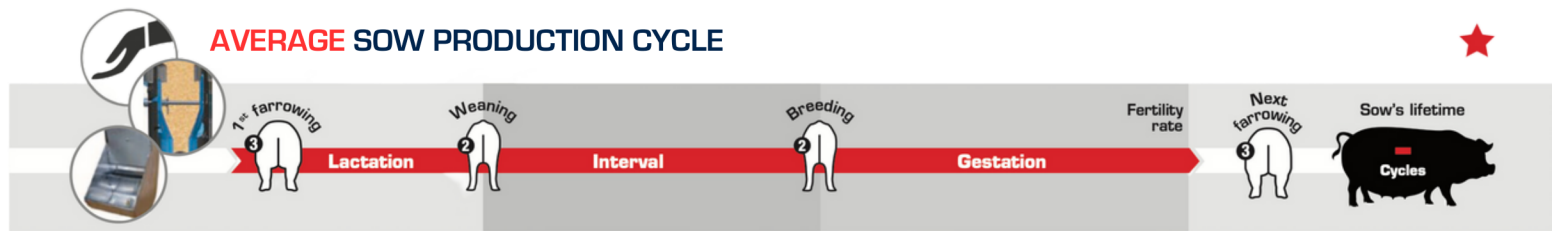

- Manage sows individually using feeder keypad, via mobile application, or directly at the computer.
- Optional water management with precise limited-pressure output at each crate to provide wet-dry feeding benefits.

A HIGHLY EFFECTIVE

FEEDING SYSTEM FOR LACTATING SOWS

AVERAGE SOW PRODUCTION CYCLE

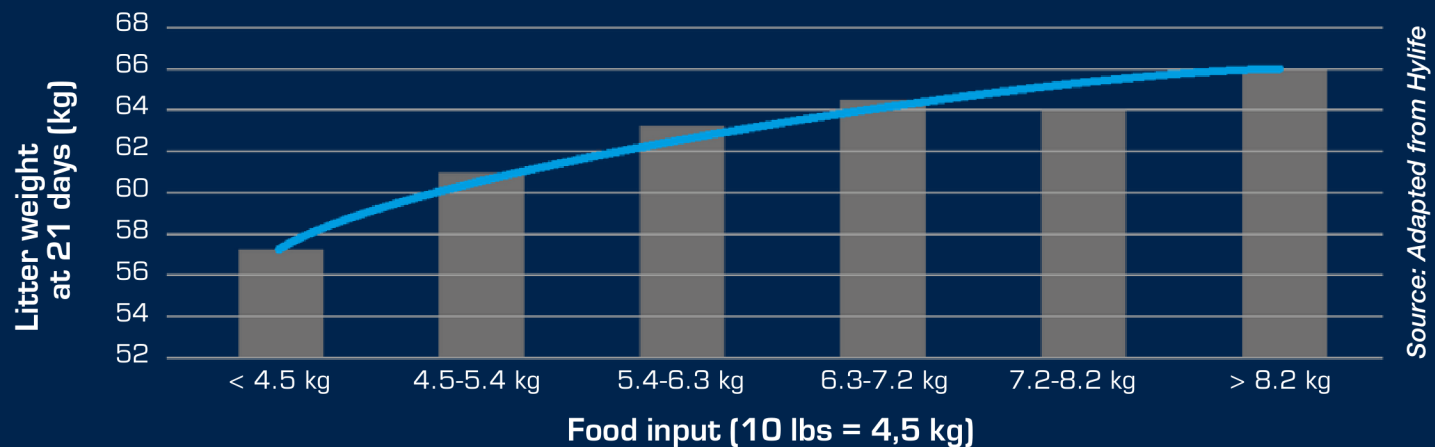

SOW PRODUCTION CYCLE WITH **gestal**

IMPACT OF FEED INTAKE ON LITTER WEIGHT

LITTER WEIGHT AT 21 DAYS ACCORDING TO THE SOW'S FEED INTAKE (HYLIFE R&D SOW FARM)
