

EVOLUTION OF THE GESTAL LACTATION SYSTEM

- Gestal Quattro stimulates sow feed intake, reduces feed waste and makes sow management easier.

INDIVIDUALIZE EACH SOW'S DIET

- When used with two feed lines, the Gestal Quattro will individualize nutrient delivery by custom blending multiple diets according to each sow's prescribed needs.

GENERATE ELECTRICITY SAVINGS

- No need to add additional electric outlets - sharing the same outlet as the heat lamp/mat.
- Using customizable heat curves and a temperature probe to adjust piglet area daily, it will reduce electricity demands while improving litter performance.

MAKE SOW DATA MANAGEMENT EASIER

- Each feeder is WiFi compatible for rapid data transfer to handheld tablets and to help workers quickly transfer farrowing information and improve in-barn sow monitoring during farrowing.

OPTI

OPTIMIZE YOUR GESTAL QUATTRO WITH FEED BLENDING.

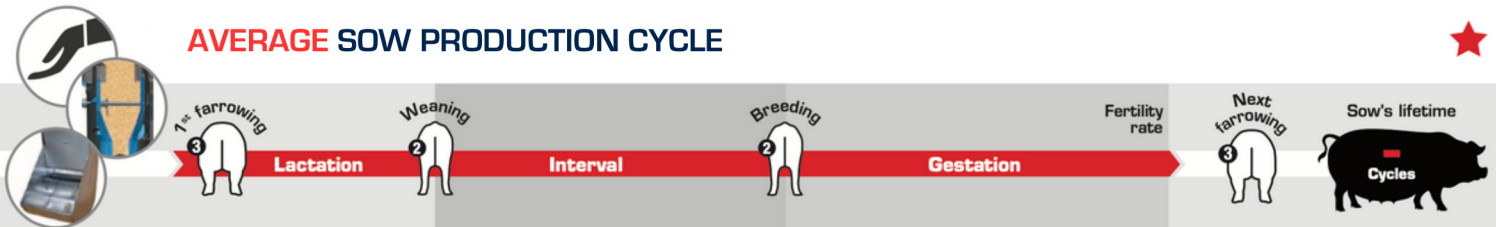

THE QUATTRO OPTI IS DESIGNED FOR USE IN COMMERCIAL AND RESEARCH APPLICATIONS ALIKE.

- Potential for feed savings by feeding diets specific to parity and feed blending.
- Can mount to either 2 or 4 feed lines.
- Daily feeding curve adjustments to eliminate feeding phases.
- Fewer diet limitations with the capability of blending two distinct diets.
- Allows to feed sows according to their needs and considering the parity, days in lactation and piglets fed.

- ⊕ Labour Saving
- ⊕ Electricity Saving

CUMULATIVE EFFECTS OF GESTAL LEAD TO A RETURN ON INVESTMENT IN LESS THAN TWO YEARS, ACCORDING TO CUSTOMERS' TESTIMONIALS.
